> An extraordinary case of swindling is recorded in the late San Francisco journa's, as having occurred in that city. A man named McCann, who keeps an exchange office on Pacific Street, did a considerable business in the purchase of gold dust, in consequence of his paying higher rates than any other establish. ment. He has frequently been arrested and taken before the Recorder on charges of abstracting gold dust from the bags of miners who offered it for sale but in what manner the theft was performed could detect the theft, and much curiosity was felt as to the result. A miner, who had been enquiring for a mines, was recommended to McCann's and a police. and had the dust weighed by a careful and experiminer's own estimation, which was 384 ounces. The gold was then carefully put back into the bag, field weighed in presence of the policeman, and found to he only 32oz. 8dwts. > THE SANDWICH ISLANDS .- The Boston Courier says private letter from an intelligent source at the lelands, dated Honolulu, May 14, 1854, received in that city, thus speaks of the annexation project:

"The regislature is now in session, and the subject of annexation will be brought up for action, but is my opinion that they will do nothing about it this year. The natives are discussing the subject and wish for time to consider it. The British and French Councils are doing all they can to prevent such a consummation. A newspaper has been established here which is published in the native tongue, and is edited by an American, devoted to explaining the subject. It has a large circulation, and is doing more to effect annexation than anything yet adopted.
